The officer then tried to arrest the complainant and a struggid ensued in the course of which the complainant fell and broke one of his ribs. If the Opium Farmer had known that serious hurt had been done to the constable he would have engaged a solicitor earlier, but he thought the case was only one of the ordinary quarrols that take place between the excise officers and the water police. Animosity had frequently been proved on the part of the police against the Opium Farm people. The officers were quite justified in wanting to search the police, who were up to all sorts of bad practices. His Worship declined to reopen the case, and remarked that in thinking the matter over he came to the conclusion that Sunder Singh had been let off too easily, and that he ought to have been sent to gaol for two months instead of for all weeks.

Much has been said on the subject of late suppers, but a recent consensus of oninion at a meeting of medical practitioners Berlin, with 1,315,600 people, has only was the following: Brain workers should not go to bed supporless, but some nutritions, easily digested article should be eaten. A bowl of stale bread and milk. rice or farinaceous food, with milk or hot soup, was highly recommended.

An entirely new race of Indians has been discovered at Labrador.

Cork is being used as a covering for steamlpipes, with good results. Recent calulations upon the pace of the sun place it at about forty miles a second.

The rabbit, scientists have ascertained. can endure a lower degree of temperature than any other animal.

Steel chimneys cost only about two thirds as much as brick stacks, and can be built in a much shorter time.

An electric flying machine was recently made to rise to a height of seventy feet and 2,888,0 0 square miles and in North Amer- ily about 4 0 yards.—N. Y. Times. Phosphorous is now being made by electricity. The principal manufactory is in

England, where it is anticipated fully 1,000 tons will be made annually. The Liverpool Journal of Commerce is informed that the engineering world will shortly be startled by the appearance of a new engine which will revolutionize motiva

The successful transmission of a powerful current of electricity from Lauffen to Frankfort has revived interest in the suggestion to send a current of equal intensity from Niagara to Chicago.

A new type of drawbridge is being built in Chicago, to span the Chicago river. By a folding, instead of a swinging process, no central pier is needed, and greatly increased facilities for navigating the narrow river

are obtained. A German biologist says that the two eides of the face are never alike. In two is stronger than the other in seven persons out of ten, and the right ear is generally

higher than the left. It is claimed that the steamer Majestic is the most economical coal burner of any of the Atlantic 'high-fliers.' She burns 220 tons of coal a day, shows 1,500 horse-power and makes an average of over 20 knots, or 23 miles per hour throughout the Atlantic

Dr Hugouneng, after experimenting with action of pepsin. Those which are most highly charged with coloring matter, alcohol and cream of tartar, are most burtful. It is found that the acidity of new wines is calculated to aid the action of the papsin.

A Frenchman named Sherer has invented a method of killing flies, mosquitoes and other insects by electricity. Inside of a cage of wire gauze a lighted candle is placed, and the gauze is connected with the Prince Oscar of Sweden, who married poles of an electric battery. The insects. nervous system. It savs that despite the Samson precedent the Chinese are mostly bald, yet they form the most enduring of races. The average madhouse furnishes proof that long and thick hair is not a sign of intellectuality. The easily-wheedled Esau was hairy, while the mighty Casar was bald. Long-haired men are generally weak and fanatical and men with scant hair are the philosophers and statesmen and soldiers of the world.'

The rapidity with which a new metal is applied to purposes hitherto undreamed of is peculiarly characteristic of our times. Among the latest evidences of its progress is the use of aluminium in the construction of sound-boards for stringed musical instruments. It has been found to possess a. latent quality, so it is asserted, which makes it highly valuable for this purpose, the metallio' tones produced by the use of other metals being conspicuously absent; by a London journal for the best definition and it possesses an elasticity capable of of money by submitting this one: 'An ar- sympathetic vibration uniformly though a
